Updated:	07/20/2013	**Due date:**	
Subject:	Organize Projects Page Entries		

Description

I'm not quite sure how Redmine lists the projects on the Projects page currently, but it starts out looking like it's alphabetical and then seems somewhat random towards the bottom of the list. It might be helpful if the user had the ability to order the projects alphabetically or by something like creation date with the additional ability to set ascending or descending order as well.
